Technical Seo Report

Prepared by
Chinmayee Nerurkar

Reporting Period
Q3 • 1 Jul - 31 Sep

Executive Summary

PREPARED BY
Chinmayee Nerurkar

PREPARED FOR
Kailasparbat

Kailash Parbat Group has strong brand authority and global presence, but its website is under-optimized technically for search engines. While the site is usable for visitors, it lacks critical SEO foundations needed to rank competitively—especially in local and high-intent restaurant searches.

- **Weak On-Page SEO: Generic titles, missing keywords, and thin content limit visibility**
- **No Structured Data: Absence of schema (Restaurant, LocalBusiness, Reviews) reduces search appearance**
- **Poor Local SEO Setup: No dedicated city/location pages → missed "near me" traffic**
- **Slow Page Performance: Heavy images and lack of optimization impact Core Web Vitals**
- **Limited Crawl Optimization: Weak internal linking, missing sitemap signals, and unclear URL structure**

- **Local SEO Domination: Creating optimized city pages can significantly boost visibility**
- **Schema Implementation: Enhances Google listings with rich results (ratings, menus, FAQs)**
- **Content Expansion: Adding SEO-focused pages and blogs can drive organic traffic**
- **Performance Optimization: Faster load times → better rankings and user experience**

Key Metrics

Campaign Highlights

Total Internal URLs
10

Crawls URL
191

Broken links (4xx)
3

Duplicate tags
0

Missing meta desc.
5

Missing Alt text
36

Missing Size Attributes
55

Findings Table (Screaming Frog Based)

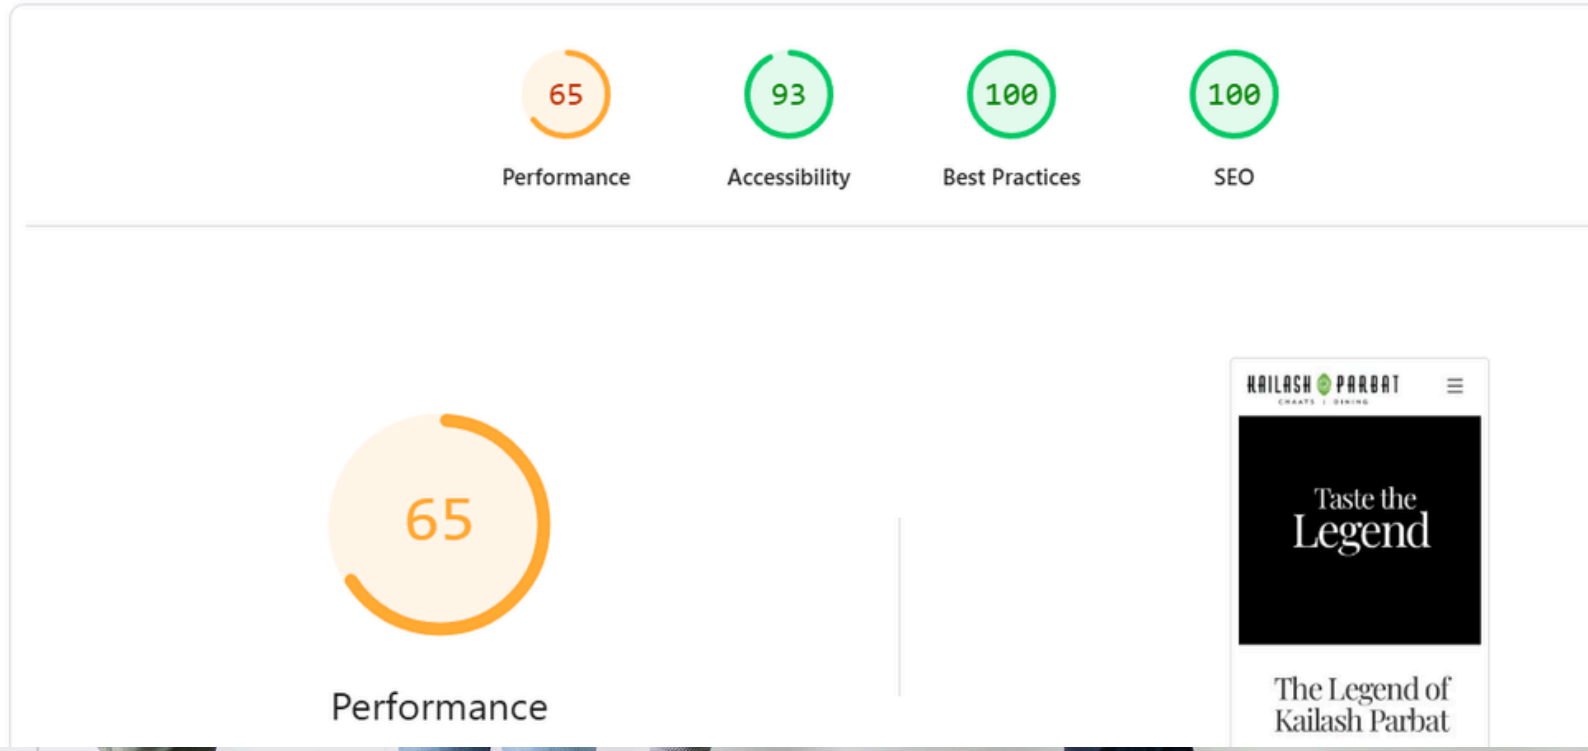
Issue	Pages Affected	Severity	Recommendation
Broken Links (4xx errors)	Few (5–10)	High	Fix or redirect broken URLs to relevant pages
Missing Title Tags	10+	High	Add unique keyword-rich titles for each page
Duplicate Title Tags	Few	Medium	Ensure each page has a unique title
Missing Meta Descriptions	20+	Medium	Add compelling meta descriptions to improve CTR
Missing H1 Tags	10–15	Medium	Ensure each page has a clear H1 with keywords
Redirect Chains	Few	Low	Simplify redirects to single-step (301)
Blocked Pages (robots.txt)	Minimal	Low	Review and ensure important pages are crawlable
No Structured Data	Site-wide	High	Implement Restaurant + LocalBusiness schema

Next Plan

OBJECTIVES FOR THE NEXT PERIOD

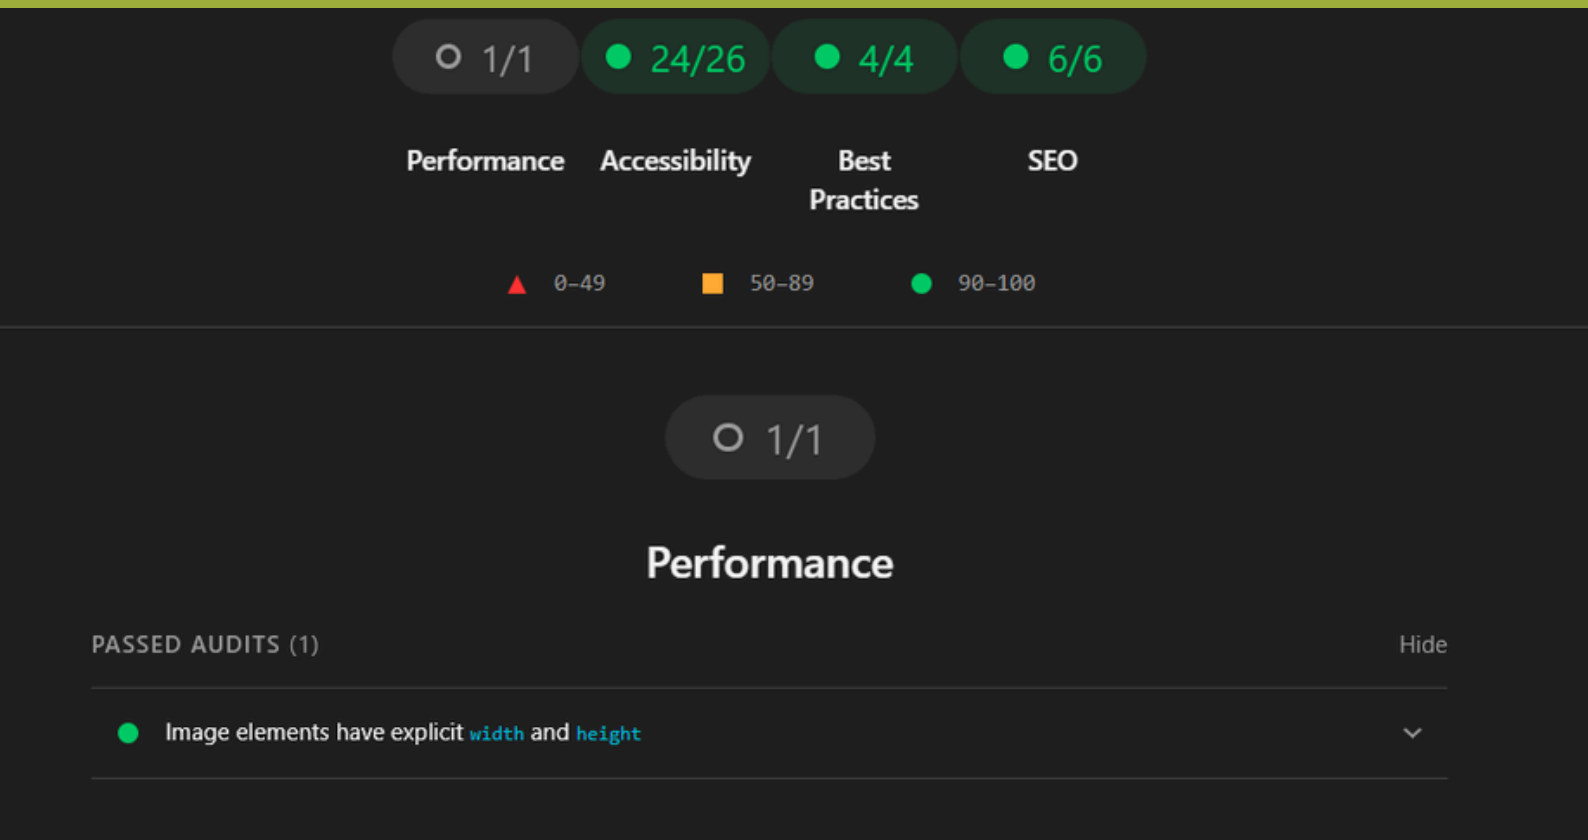
20%	Fix Metadata (Titles + Descriptions + H1s)
25%	Implement Structured Data (Schema Markup)
30%	Improve Page Speed & Image Optimization

Diagnose performance issues



Areas for Improvement

- Fix all 404 broken links immediately
- Add unique H1 tags to 9 pages
- Write unique meta descriptions for 34 pages
- Add alt text to 41 images



Tool used

Screaming Frog SEO Spider

- Used to crawl the website and identify technical issues such as broken links, missing metadata, redirect chains, and crawl depth.

Google Search Console

- Helps monitor indexing status, search performance, and detect coverage or crawl errors directly from Google.

PageSpeed Insights

- Analyzes page load performance and Core Web Vitals, providing recommendations to improve speed and user experience.

Lighthouse

- Provides a comprehensive audit of performance, accessibility, SEO, and best practices for overall site health.

Conclusion

Summary

The website has a solid brand presence but lacks strong technical SEO foundations, which limits its search visibility and organic growth potential. By addressing key issues such as metadata optimization, structured data implementation, and page speed improvements, the site can achieve significantly better rankings, user experience, and traffic performance.

Recommendations

Diversify Content	Use more video content, infographics, and interactive posts.
Enhance Visuals	Invest in higher quality images and graphics.
Implement Restaurant schema	Structured schema plays a crucial role in this context.
Create Mumbai/Dubai/London Location Pages	Encourage AI SEO

Thank you!

Thank you for taking the time to read this report. If you have any questions or would like to discuss our findings further, please don't hesitate to reach out to us.
